

Name that Stage!

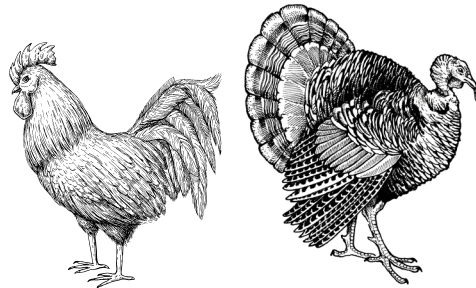

Turkeys and chickens are both poultry — domestic birds raised for eggs or meat. They have similarities and differences throughout their lifecycle. Use the word bank to name the stage of life. Some answers may be used twice!

Chicken

Turkey

Word Bank:

- Gobbler
- Hen
- Egg
- Poult
- Chick
- Rooster

Did you know? Fun facts about poultry:

- Eggs are not solid — they have thousands of tiny holes in them called pores. These help the egg “breathe” as the embryo develops!
- The color of a chicken egg reflects the color of the chicken’s earlobe!
- Wild turkeys can run up to 25mph and fly as fast as 55mph! Domestic turkeys cannot fly.
- There are more chickens in the world than any other bird species
